

AgriPix Camera Settings Card

Quick Setup for Stock Photography

- Shoot in RAW + JPEG
- Use full resolution (largest image size)
- Keep ISO low (64–200 preferred)
- Aperture: f/5.6 – f/11 for sharpness
- Use fast shutter speed to avoid blur
- White balance: Auto or Daylight
- Picture Control: Standard or Neutral
- Avoid over-editing and heavy filters

In the Field

- Capture people working, not posed
- Show machinery in action
- Include wide shots to show scale
- Take close-ups for detail
- Leave space for text (copy space)

Quick Tip

Keep this guide handy out in the paddock to help you capture images that buyers are looking for.
